

ROUNDING and ESTIMATING NUMBERS

Rounding Rollercoaster

- 4 or less- STAY THE SAME
- 5 or more- GO HIGHER

What is "Rounding" ?

- Rounding means reducing the digits in a number while trying to keep its value similar.
- *The result is less accurate, but easier to use.*

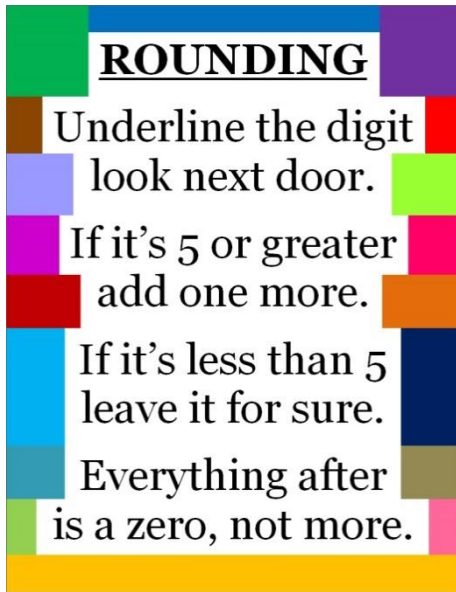

Example:

- 73 rounded to the nearest ten is 70, because **7**3 is closer to 70 than to 80.

How can I do that?

Follow these steps

1. Underline the digit in the correct place.
2. Look next door (the next number)
3. If it's 5 or greater add one more.
4. If it's less than 5 leave it.
5. Change the remaining digits to zeros.

So...

Round to the nearest ten: 8,569

1. Underline the digit in the correct place
2. Look next door (the next number)
3. If it's 5 or greater **add one more.**
4. If it's less than 5 leave it.
5. Change the remaining digits to zeros.

1. 8,569

2. 8,569

3. 8,569:

9 > 5 (add 1 more)

6 + 1: 7

5. 8,570

Rounding Rap

1. Find the place! 84 87

2. Hook next door! 84 87

3. 5 or higher, up one more! 87 \approx 9
8+1=9

4. 4 or less, stay right there! 84 \approx 8

5. Zeros almost everywhere!

$$87 \approx 90$$

$$84 \approx 80$$

Practice

- 1) Round to the nearest ten. 3,600
- 2) Round to the nearest ten. 73
- 3) Round to the nearest hundred. 79,639
- 4) Round to the nearest ten. 7,867
- 5) Round to the nearest hundred. 38,484
- 6) Round to the nearest ten. 8,569
- 7) Round to the nearest hundred. 91,927
- 8) Round to the nearest hundred. 302
- 9) Round to the nearest hundred. 69,065
- 10) Round to the nearest ten. 10

Now,

- 1) Round to the nearest ten. 61
- 2) Round to the nearest ten. 2,535
- 3) Round to the nearest hundred. 919
- 4) Round to the nearest ten. 11
- 5) Round to the nearest thousand: 8,811
- 6) Round to the nearest hundred. 35,946
- 7) Round to the nearest hundred. 43,214
- 8) Round to the nearest thousand: 7,583
- 9) Round to the nearest ten. 162
- 10) Round to the nearest ten. 5,460
