

MAPS

WHAT ARE MAPS?

- Maps are very useful tools for people. All of us owe them much, because due to them we know to sites. Many explorers charged new routes and discovered new words with the help of maps. The sense of adventure, discovery and travel are essential since great historical figures could not have performed their feats without the help pf these instruments.

PHYSICAL MAPS

- Physical maps show the landforms of a place. Physical features such as mountains, oceans, rivers, deserts, islands, and seas will be marked on the map, often using symbols and colors. Political boundaries that mark off various countries and some large cities are often included on physical maps.

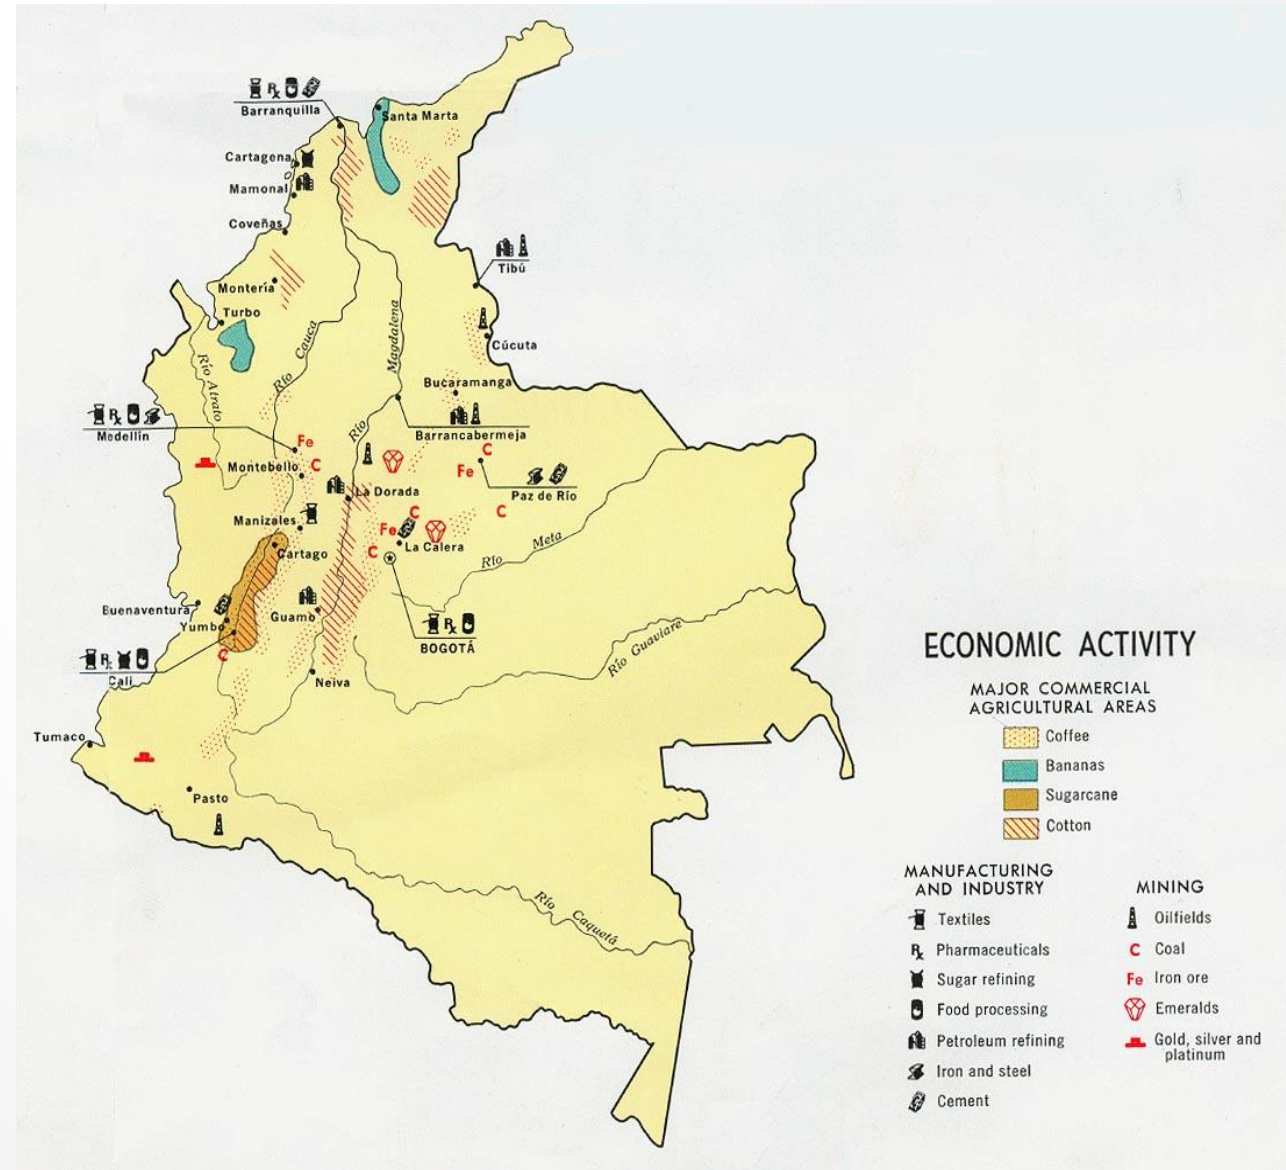

POLITICAL MAP

- Political maps are designed to show governmental boundaries of countries, states, and counties, the location of major cities, and they usually include significant bodies of water.

ECONOMIC OR RESOURCE MAP

- An economic or resource map shows the specific types of economic activity or natural resources present in an area through the use of different symbols or colors depending on what is being shown on the map

DEMOGRAPHIC MAP

- A demographic map shows the distribution of the population that inhabited a place.
